

GENERAL INFORMATION

KFFA was founded in 1974 by a group of local anglers with a common interest in and a love of Fly Fishing. It is a fully constituted amateur organisation run for the benefit of its members who share a passion for Fly Fishing and enjoyment of the countryside.

Kennick Reservoir is operated by South West Lakes Trust. Established in April 2000, South West Lakes Trust is the South West's largest conservation and recreation charity. It was created to encourage, promote and enhance sustainable recreation, access, nature conservation and education on and around over 50 inland waters in the South West for the benefit of all.

There are 3 reservoirs in the complex of which Kennick offers Trout Fishing, Trenchford is open for Pike Fishing and Tottiford is available for the public to walk around.

Kennick offers superb trout fishing set on the edge of Dartmoor with some of the West Country's finest scenery. Fish in early summer and you will witness the Rhododendrons around the reservoir out in their splendour. Fish in the autumn when the colours all around are fantastic.

Kennick is 46 acres in size and was built in 1884 and was one of the first venues in Europe to stock with rainbow trout. They are stocked on a regular basis and average between 1.5 - 2lbs with specimen fish added from time to time.

Record Rainbow 14lbs 11oz - (2009)
Record Brown 8lbs 2oz
Rod Average in 2011 - 3.4
Biggest Fish in 2011 - 7lbs 12oz
